Introduction

About the Labour Market Monthly

The *Labour Market Monthly*[1], produced monthly by the Economics & Statistics Division of the Nova Scotia Department of Finance, is based primarily on data from the *Labour Force Survey (LFS)*, a household survey carried out monthly by Statistics Canada. The *LFS* is a sample of individuals who are representative of the civilian, non-institutionalised population 15 years of age or older in Canada's ten provinces. Specifically excluded from the coverage of the *LFS* are residents of the Territories, persons living on Indian Reserves, full-time members of the Canadian Armed Forces and institutional residents. These groups represent an exclusion of approximately 2 per cent of the population aged 15 or over. As of January 2006, the sample size has been approximately 53,372 households across Canada, with 2,873 of those in Nova Scotia.

Since its inception in 1945, the objectives of the *LFS* have been to divide the working-age population into three mutually exclusive classifications—employed, unemployed and not in the labour force—and to provide descriptive and explanatory data on each of these categories. Data from the *Survey* provide information on major labour market trends such as shifts in employment across industrial sectors, hours worked, labour force participation and employment rates.

The *Labour Market Monthly* contains: 1) year-to-date *LFS* highlights; 2) summary tables of selected labour force characteristics including labour force, employment, unemployment, unemployment rate and participation rate for Canada, the provinces, and CMAs; 3) a feature article; and 4) a selection of additional key employment indicators obtained from other Statistics Canada surveys.

The *Labour Market Monthly* emphasizes the Nova Scotia employment situation and includes tables for Nova Scotia, its economic regions, and the Metropolitan Halifax area. The *Labour Force Monthly* coincides with Statistics Canada's Labour Force Survey release dates and will be available on our web site that day:

http://www.gov.ns.ca/finance/publish/publicationsb.asp?id=Pub19

Specific release dates each month are noted below:

Highlights

LFS Release – September 2008

(October 2008 will be released November 7, 2008)

Refer to *Appendix I* for a series of statistical tables indicating key labour force characteristics for current month, last month and same month a year ago:

Employment Situation:
Table 1 – Basic Characteristics, Canada/Provinces
Table 2 – NS Economic Regions/Halifax CMA
Table 3 – Job Tenure. Canada/Provinces
Table 4 – Employment by Sector, Canada & NS
Table 5 – CMAs, Canada

Appendix II provides a glossary of definitions, concepts/methods and sources associated with the labour market information covered in the *Labour Market Monthly* publication.

The Daily released by Statistics Canada today highlighted the following related to Nova Scotia:

"Five provinces accounted for the overall employment increase this September: Ontario, Quebec, Alberta, Saskatchewan and Nova Scotia."

"Employment also increased in Nova Scotia in September, up 4,900, bringing the employment rate back to its record high of 59.3%."

Seasonally Adjusted (month over month and year over year)

In Nova Scotia September 2008, labour force increased 0.6 per cent over August 2008 to 494,400 and increased 2.0 per cent over August 2007. Employment increased 1.1 per cent over August 2008 to 456,800 as a result of the increase in part-time employment (8.2%). Employment increased 2.4 per cent over September 2007. Unemployment declined 4.8 per cent over August 2008 to 37,600 and declined 1.8 per cent over September 2007. Unemployment rate declined 0.4 percentage points over August 2008 to 7.6 per cent.

In Canada September 2008, labour force increased 0.6 per cent over August 2008 to 18.3 million and increased 1.8 per cent over September 2007. Employment increased 0.6 per cent over August 2008 to 17.2 million and increased 1.6 per cent over September 2007. Unemployment increased 0.6 per cent over August 2008 to 1.1 million and increased 5.2 per cent over September 2007. Unemployment rate remained unchanged over August 2008 at 6.1 per cent.

On a three-month moving average basis, seasonally unadjusted, the unemployment rate for the Halifax Census Metropolitan Area (CMA) in September 2008 declined 0.1 percentage points to 5.7 per cent over the previous month. The Halifax CMA continues to have the lowest unemployment rate east of Quebec (3.9%). The lowest unemployment rate, 3.7 per cent, was in Edmonton and Victoria, while the highest rate, 10.3 per cent, was in Windsor, Ontario.

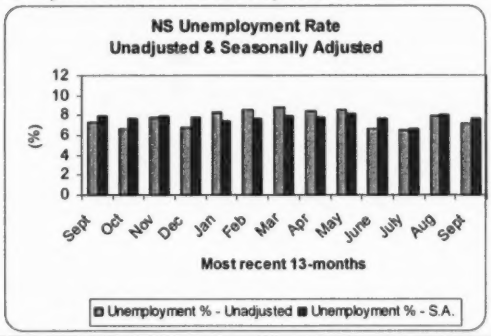
Trend – January to September (year-to-date)

At the end of the first nine months of 2008, Nova Scotia's labour market conditions continued to improve with the seasonally adjusted employment and labour supply posting year-to-date gains of 1.3 and 0.8 per cent, respectively. The net impact of employment growing faster than the labour force was a decline of 5.2 per

cent in the number of unemployed workers and a drop of 0.5 percentage points in the unemployment rate to 7.7 per cent. This growth in employment also increased the employment rate by 0.5 percentage points to 58.9 per cent for the first nine months of 2008. The slower pace for labour force growth resulted in a 0.2 percentage increase to the participation rate to 63.8 per cent for the same period.



Source: Statistics Canada, *Labour Force Survey*, Catalogue No. 71-001-XIE

Full-time employment for the first eight months of 2008 compared to the same period in 2007, has increased 1.1 per cent. Most of this growth was because of strong growth in recent months. After decelerating by 0.2 per cent for the January to May period, full-time employment grew 2.4 per cent from May to August 2008. The number of part-time employees grew 1.6 per cent.

Labour Force Basic Characteristics, Nova Scotia
Average Year-to-date (Seasonally adjusted data)

	Jan-Sept 2007	Jan-Sept 2008
Population ('000)	764.0	768.0
Labour Force ('000)	486.1	489.9
Employment ('000)	446.5	452.4
Full-time ('000)	364.4	369.5
Part-time ('000)	82.1	82.9

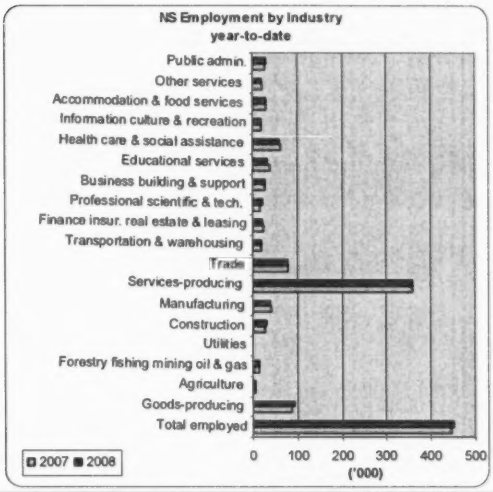
Unemployment (per cent)	8.1	7.7
Participation (per cent)	63.6	63.8
Employment (per cent)	58.4	58.9

Source: Compiled by Economics & Statistics Division, NS Department of Finance, using Statistics Canada LFS data.

A review of employment growth by industry shows that employment in the goods-producing sector grew by 6.2 per cent over the January to September period when compared to the same time frame in 2007. The goods-producing sector makes up just 20.5 per cent of total employment. Therefore, the impact on total employment was only marginal because of a very slight increase in the service-producing sector employment (0.2 per cent). The service-producing sector accounts for 79.5 per cent of total employment over the first nine months of 2008.

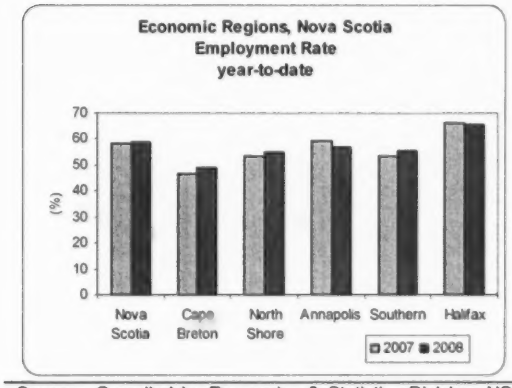
For the goods sector, all industries posted gains for the first nine months of 2008 compared to the same period in 2007 except for manufacturing. Construction contributed the most to employment growth in the goods sector, increasing 16.3 per cent. Continued growth in new home construction increased the demand for construction workers. Manufacturing employment continued to decline (4.4 percent) as a result of the slower pace of the United States economy. The recent fall in the exchange rate and lower energy prices will help support the manufacturing sector going forward. It may not, however, offset the expectation of a major US recession.

The major components of the service sector, health care and social services, and educational services reported losses in employment except trade (retail and wholesale) for the first nine months of 2008 over the same period in 2007. Trade had a 1.2 per cent increase. Relatively large employment growth in sectors such as the professional, scientific and technical services, information, culture and recreation, and transportation and business services was not enough to offset the percentage losses of employment in such substantial sectors. The large decline (5.1 per cent) in accommodation and food sector reflects to some degree the high cost of gasoline and the slow US economy. Public Administration had an increase of 7.4 per cent.



Source: Compiled by Economics & Statistics Division, NS Department of Finance, using Statistics Canada LFS data.

A breakdown of employment growth by regions within Nova Scotia reveals that four of the five sub-regions reported growth for the first eight months of 2008 compared to the same period in 2007. Cape Breton, HRM, North Shore, and Southern regions all saw employment gains and lower unemployment levels. Although the Annapolis region continued to show lower employment on a year-to-date basis, the employment levels for July to September are above at the previous year annual average.



Source: Compiled by Economics & Statistics Division, NS Department of Finance, using Statistics Canada LFS data.

NOTE: Labour force estimates at the sub-provincial level should always be viewed with caution, given they are a three-month moving average and the error estimates associated with smaller sample sizes are larger.

Other Key Employment Indicators

Along with the monthly Labour Force Survey, several other data sources provide an overview of changes occurring in the labour market of the province. The following tables reflect some of those activities.

Total Wages & Salaries

(3rd quarter 2008 will be released December 1, 2008)

Year-to-date (January to June)

In January to June 2008, total wages and salaries were $7.8 billion in Nova Scotia. This represented a growth of 5.0 per cent over January to June 2007. Canada's total wages and salaries figure, of $356.4 billion in January to June 2008, exhibited a 5.2 per cent increase over the same period a year earlier. In the first half of 2008, the Nova Scotia figure represented 2.2 per cent of the national total.

Total Wages & Salaries, Canada & Nova Scotia
- Year-to-date -

	($millions) 2007	2008

Nova Scotia	7,444.2	7,817.0

Labour income estimates are based on the North American Industry Classification System (NAICS) and are released quarterly in conjunction with the National Income and Expenditure Accounts estimates.

Data Source: Statistics Canada, Catalogue No. 13F0016XPB; CANSIM Table 382-0006

In the first half of 2008, $1.6 billion of Nova Scotia's total wages and salaries was from the goods producing sector and $6.2 billion was from the service producing sector, representing 20.8 per cent and 79.2 per cent of the total, respectively. Manufacturing and construction industries were the major components of the goods producing sector, making up 44.7 per cent and 35.5 per cent of the total, respectively. The greatest contributors to the service producing sector were professional and personal service industries; public administration; trade; and health care and social assistance—at 19.4 per cent, 17.6 per cent, 17.2 per cent and 15.7 per cent, respectively.

Average Weekly Earnings (including overtime)

(August 2008 will be released October 29, 2008)

Year-to-date (January to July)

In the first seven months of 2008, the average weekly earnings for all employees in Nova Scotia increased 2.1 per cent over the same period of 2007 from $672.56 to $686.67 per week. In comparison, the average weekly earnings for all employees in Canada rose 2.8 per cent, from $766.49 to $788.06 per week. Nova Scotia's average weekly earnings in January to July 2008 were $101.39, or 12.9 per cent, less than the Canadian average.

In Nova Scotia, average weekly employment was 391,508 (all employees as reported in SEPH) in the first seven months of 2008, a 2.2 per cent increase from the same period of 2007.

In comparison, Canada's January to July 2008 average weekly employment was 14.5 million, an increase of 1.9 per cent from January to July 2007.

Employment Insurance

(August 2008 will be released October 29, 2008)

Year-to-date (January to July)

In the first seven months of 2008, there was an average of 40,539 beneficiaries in Nova Scotia that received *EI* benefits. This figure is 2.3 per cent lower than the same period of 2007. Nationwide, there was an average of 772,197 beneficiaries, a 1.8 per cent decrease from the first seven months of 2007.

[1] Preliminary year-to-date monthly average

Data Source: Statistics Canada, CANSIM Table 276-0001 and 276-0005

In Nova Scotia, a total of $438.4 million was paid in EI benefit payments from January to July 2008. This figure is 0.2 per cent more than the benefits paid from January to July 2007. Nationwide, there was $8.0 billion paid in EI benefit payments in January to July 2008, a 1.8 per cent decrease from the same period in 2007.

Public Sector Employment – Nova Scotia

(3rd quarter 2008 will be released November 27, 2008)

Year-to-date (Jan - June 2008)

Data from the Statistics Canada *Public Sector FMS Reports* indicates that there was an average of 122,129 public sector employees in Nova Scotia during the first half of 2008, an increase of 2.0 per cent over the average of the same period of 2007. The government sector increased 2.2 per cent to 113,538, while the business enterprises sector declined 0.7 per cent to 8,592. The federal government figure increased 0.2 per cent to 23,974. The military component of federal employees in Nova Scotia decreased 0.8 per cent to 10,580 from January to June 2007 to January to June 2008.

Appendix II - Glossary

Labour Force Survey (LFS)

The following are key definitions used in the LFS. For a more detailed dictionary of concepts and definitions refer to Statistics Canada, *Guide to the Labour Force Survey*, Catalogue No. 71-543-GIE. Statistics Canada outlines other labour force information products and services in *Labour Force Survey Products and Services*, Catalogue No. 71-544-XIE.

Population: The target population covered by the survey corresponds to all persons aged 15 years and over residing in the provinces of Canada, with the exception of the following: 1) persons living on Indian Reserves, 2) full-time members of the regular Armed Forces, and 3) persons living in institutions.

Labour Force: The civilian non-institutional population 15 years of age and over that, during the survey reference week, was employed or unemployed and actively looking for work. Prior to 1966, persons aged 14 and over were covered by the survey.

Employment: Employed persons are those persons who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Full-time Employment: Refers to those persons who usually work 30 hours or more per week at their main or only job.

Part-time Employment: Refers to those persons who usually work less than 30 hours per week at their main or only job.

Unemployment: Unemployed persons are those persons who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Not in the Labour Force: Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets, that is, they were neither employed nor unemployed.

Unemployment Rate: Unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate: The total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Employment Rate: The number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, province, etc.) is the number employed in that group expressed as a percentage of the population for that group.

Seasonal Adjustment (s.a.): Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as long-term cyclical fluctuations. The seasonal adjustment program is a complicated computer program which differentiates between these seasonal, cyclical and irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal

factors for current data. On an annual basis, the historic series of seasonally adjusted data are revised in light of the most recent information on changes in seasonality.

Wages and Salaries

Wages and Salaries: Wages and salaries is an aggregate of many types of payments made to employees—regular remuneration, directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances, retroactive wage payments and stock options. Wages and salaries are estimated on a "gross" basis that is, prior to deductions for employees' contributions to income tax, employment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employer contributions to employee welfare, pensions, workers compensation and employment insurance. Wages and salaries, as well as, supplementary labour income are the components of Labour Income (all compensation paid to employees).

Wages and salaries estimates are derived to supply the System of National Accounts (SNA) with the Labour Income component of the Gross Domestic Product (GDP). Monthly estimates of wages and salaries are published, on a quarterly basis, for 16 industry groups. Industrial coverage is based on the North American Standard Industrial Classification System (NAICS).

For a more detailed dictionary of concepts and definitions from Statistics Canada, *Estimates of Labour Income,* Catalogue No. 13F0022-XIE or refer to:

Average Weekly Earnings

Average Weekly Employment: For purposes of developing average weekly employment and average weekly earnings data, the target population of the Statistics Canada Survey of Employment, Payrolls and Hours (SEPH), is composed of all employers in Canada, except, 1) those owners or partners of unincorporated business and professional practices, the self-employed, unpaid family workers, persons working outside Canada, casual workers for whom a T-4 is not required; 2) agriculture, fishing and trapping, private household services, religious organizations; and 3) the military. It draws its sample from the Business Register (BR) maintained by the Business Register Division of Statistics Canada and from a list of all businesses registered in Canada Customs and Revenue Agency's Business Number program with one or more active payroll deduction accounts.

Average Weekly Earnings: The Survey of Employment, Earnings and Hours is produced from the combination of the Business Payroll Survey results and the payroll deductions administrative data received Canada Customs and Revenue Agency.

SEPH is Canada's only source of detailed information on the total number of paid employees, payrolls, and hours at detailed industrial, provincial and territorial levels.

For further information about the *Survey of Employment, Payrolls and Hours* (SEPH), No. 2612, refer to Statistics Canada, *Employment, Earnings and Hours*, monthly, Catalogue No. 71-002-XIB or annual, Catalogue No. 72F0023-XCB; *CANSIM Tables 281-0023, 281-0024, 281-0026 and 281-0027.*

Employment Insurance (EI)

Employment Insurance Statistics*: The Employment Insurance Statistics Monthly* reports official statistics on the operation of the *Employment Insurance Statistics Program* and provides complementary labour market statistics. Statistics are produced from an administrative data source and may, from time to time, be affected by changes in the *Employment Insurance Act* or administrative procedures.

Number of Beneficiaries: The number of beneficiaries represents a count of persons who received Employment Insurance (EI) benefits during the *Labour Force Survey* reference week (usually containing the 15th day of the month).

Regular Benefit Payments: The regular benefit payments series measures the total of all monies received by individuals for the entire month, e.g., regular, training, job creation, sickness, self-employment, maternity, adoption, parental, retirement, fishing, work sharing and compassionate benefits.

For further information related to the EI data see Statistics Canada, *CANSIM Tables 276-0001 and 275-0006, 276-0011, 276-0015 and 276-0006.*

Public Sector

Public Sector: The population of public sector employment consists of all institutional units controlled and mainly financed by governments (federal, provincial, territorial and local) in Canada, including their business enterprises, Thus, the term "government" presented in the Statistics Canada's Public Sector Employment Survey includes all organizations controlled by any of the three levels of government that are not-for-profit and perform non-commercial services. The Canadian military (regular forces and reservists) and uniformed RCMP members are included in the federal government. Organizations controlled by government that operate as commercial corporations (such as Canada Post or Hydro-Quebec) are considered government business enterprises. The two combine to give the total public sector.

Employment: Employment is a measure of the number of individuals who work within a given industry. In other words, employment refers to the number of persons drawing pay for services rendered or for paid absences, regardless whether employed on a full time, part-time or on a temporary basis.

Wages and Salaries: Wages and salaries include directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances, and retroactive wage payments. Wages and salaries are estimated on a gross basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, or pension plans. Wages and salaries accumulating over time, for example, retroactive payments, are accounted for in the month and year in which they are paid. Supplementary labour income, such as employer contributions to pension, medical or similar plans are not included.

Further information on public sector employment can be downloaded from Statistics Canada, *Canadian Statistics* module; *CANSIM Tables 183-0002 and 183-0004.* As well, more detailed information, definitions, data sources and methods for Survey No. 1713 are available at:
